

**Supplementary Fig. 3.** Effects of MnTBAP and SB203580 on 3OTPCA-induced phosphatidylserine externalization in U937 cells. Cells were pre-incubated with 100  $\mu$ M MnTBAP or 100  $\mu$ M SB203580 for 1 h and then co-incubated with 40  $\mu$ M 3OTPCA for 12 h. Cells were stained with annexin V-FITC and PI followed by flow cytometry. The data represent the mean  $\pm$  SD (N = 3). \*\* $p$  < 0.01 vs. CT (Student's t-test).
