

Fig. S5. Raltegravir does not increase the type I IFN response in macrophages. NR9456 cells treated with raltegravir at the different concentration (0, 0.5, 5 mg/ml) were sequentially transfected with indicated siRNAs. Expression levels of IFN- β , Cxcl10, Trex1 and Aim2 were measured by RT-qPCR. Values were normalized to *Gapdh* and are shown as mean \pm SEM of three experiments in triplicate. * $P < 0.05$ and *** $P < 0.0005$ (two-tailed t-test).
