

Fig. S1 Anti-Aha1 antibody testing. (His)₁₀::Aha1 was used to raise antibodies in a chicken. Western blot analysis showed that Aha1 antibodies recognise the natural protein in the lysates of *L. major*, *L. donovani*, the recombinant protein (His)₁₀::Aha1, but not the orthologues in *T. cruzi* Y and *T. cruzi* Tulahuen lysates. Positions of size markers [kD] are shown on the left.
