

Supplemental Fig S7. Characteristics of temporal-specific lncRNA expression in the PFC

(A) RNA-seq expression (top) and qPCR (bottom) validation of a temporal-specific lncRNA, *AC112693.3*.

(B) Representative ISH validation of *AC112693.3* in PFC across the four ages with 10x amplification image. The images are representative of replicates of three independent experiments.

(C) RNA-seq expression (top) and qPCR (bottom) validation of a temporal-specific lncRNA, *AC016757.3*.

(D) Representative ISH validation of *AC016757.3* in PFC across the four ages with 10x amplification image. The images are representative of replicates of three independent experiments.
