

S2 Fig. Molecular phylogenetic tree of 19 *Aconitum* species based on 70 protein-coding genes in the cp genome. (A) 19 *Aconitum* species used in this study excluding *A. kusnezoffii* (KT964696.1) and *A. jaluense* (KT820669.1). (B) 19 *Aconitum* species used in this study excluding *A. kusnezoffii* (NC 031422.1) and *A. jaluense* (KT820668.1). The tree was constructed by maximum likelihood analysis using MEGA6 with a bootstrap test of 1,000 replications.
