**Supplementary Table S2.** Component loadings of the personality traits on three Varimax-rotated principal components.

Trait labels	Aggressiveness	Shyness	Extraversion
Aggression towards other cats	<b>0.75</b>	0.12	0.01
Aggression towards family members	<b>0.90</b>	0.08	-0.03
Aggression towards strangers	<b>0.88</b>	0.15	-0.05
Activity level	-0.02	-0.02	<b>0.89</b>
Shyness towards novel objects	0.15	<b>0.93</b>	-0.10
Shyness towards strangers	0.15	<b>0.93</b>	-0.17
Contact to people	-0.03	-0.26	<b>0.83</b>

**Supplementary Table S3.** The AIC model selection and the final models of logistic regression analyses. N = 5726 (personality trait analyses), N = 4925 (wool sucking analysis), N = 5683 (excessive grooming analysis), N = 5550 (owner-evaluated behaviour problem analysis).

<b>Contact to people</b>						
Model	AIC	Shyness added	Breed added	Other cats added	Hormonal status added
