

Supplemental Figure 1. Immunohistochemical staining of kidneys in mock and ZIKV-infected mice. MCP-1, monocyte chemoattractant protein-1. Upper panel, representative images. Red and blue arrows donate infiltrated CD4⁺ and CD8⁺ T cells, respectively. Scale bar, 50 μ m. Lower panel, statistical analyses. **, significant difference between mock and infected groups ($p < 0.01$, Student's t test). N.D., not detected.
