

# ING5 knockdown enhances migration and invasion of lung cancer cells by inducing EMT via EGFR/PI3K/Akt and IL-6/STAT3 signaling pathways

## Supplementary Materials

Supplementary Figure 1: Effects of ING5 overexpression on protein level of EMT markers and related proteins in A549, H1299 and HCT116 cells by western blot. Actin was used as an internal loading control.

## Human Phospho-Kinase Array Coordinates

Supplementary Figure 2: Human Phospho-Kinase Array coordinates.

**Supplemental Table 1: Human phosphor-kinase array coordinates and ratio of shING5/shControl**

Coordinate	Target	Phosphorylation site	shING5/shControl
A1, A2	Reference Spot		1
A3, A4	P38 $\alpha$	T180/Y182	0.89
A5, A6	ERK1/2	T202/Y204, T185/Y187	1.66
