

Supplemental figure S7

(A) Neutralization titer of mAbs 97.3, M11 and a mixture of both mAbs.

(B) Neutralization titer of mouse sera one day after after adoptive transfer of mAb combination 97.3 plus M11. Neutralization titer was determined *in vitro* on murine fibroblasts using MCMV157luc ().

Individual mice are indicated by number and color. Dotted line: 50% neutralization.
