

Effects of Tenapanor on Cytochrome P450-Mediated Drug–Drug Interactions

Susanne Johansson, David P. Rosenbaum, Marie Ahlqvist, Helen Rollison, Mikael Knutsson, Bergur Stefansson, and Marie Elebring

Supplementary Information

Supplementary Figure 1. Effect of tenapanor on the formation of (a) hydroxybupropion (CYP2B6, IC_{50} $15.4 \pm 7.5 \mu\text{M}$) and (b) oxidized nifedipine (CYP3A4/5, IC_{50} $0.680 \pm 0.157 \mu\text{M}$) in human liver microsomes. Three replicates for each experiment are shown.
