History of abdominal / pelvic inflammation	22 (9.5)	37 (6.8)	0.201	5 (8.8)	0 (0.0)	0.025	17 (9.8)	37 (7.7)	0.397

IQR, interquartile range; ART, assisted reproductive technology; PID, pelvic inflammatory disease

^a TFI case = unilateral or bilateral fallopian tube blockage or other tubal abnormalities on HSG, or prior history of tubal ectopic pregnancy, hydrosalpinx, or surgery to repair blocked tubes; Control = bilateral patent tubes and no other tubal abnormalities on HSG and no prior history of tubal ectopic pregnancy or surgery to repair blocked tubes

^b Non-black race included: 628 white, 20 Asian, 6 other race

^c Chi-square, Fisher's Exact, or Cochran-Mantel-Haenszel test for categorical variables and Wilcoxon Mann Whitney test for continuous variables. Statistically significant ($P<0.05$) results are indicated by bold print.

IQR, interquartile range; ART, assisted reproductive technology; PID, pelvic inflammatory disease

^a TFI case = laparoscopy showing evidence of tubal damage; Control = laparoscopy within one year of study showing no evidence of tubal damage

^b Non-black race included: 134 white, 4 Asian

^c Chi-square, Fisher's Exact, or Cochran-Mantel-Haenszel test for categorical variables and Wilcoxon Mann Whitney test for continuous variables. Statistically significant ($P<0.05$) results are indicated by bold print.

Table A.3. Fraction of Tubal Factor Infertility (TFI)^a Attributable to Chlamydia, Adjusted for Selected Covariates, by Race

	Adjusted PAF (95% CI)	
Definition of <i>C. trachomatis</i> Seropositivity	Race	
	Black^b	Non-Black^c
Positive by Medac IgG MOMP	1% (-36%, 24%)	3% (-1%, 6%)
Positive by EB-ELISA (IgG1 or IgG3)	1% (-100%, 43%)	4% (0%, 9%)
Positive by EB-ELISA IgG1	-12% (-100%, 35%)	3% (0%, 6%)
Positive by EB-ELISA IgG3	-18% (-93%, 19%)	5% (2%, 9%)
Positive by Medac IgG MOMP or EB-ELISA	5% (-100%, 48%)	4% (-2%, 8%)
Positive by Medac IgG MOMP and EB-ELISA	0% (-38%, 23%)	4% (1%, 7%)

PAF, population attributable fraction; CI, confidence interval; MOMP, major outer membrane protein; EB, elementary body; ELISA, enzyme-linked immunosorbent assay

^a Tubal Factor Infertility (TFI) defined by hysterosalpingogram (HSG) case definition; TFI case = unilateral or bilateral fallopian tube blockage on HSG; Control = bilateral patent tubes and no other tubal abnormalities on HSG and no prior history of tubal ectopic pregnancy or surgery to repair blocked tubes

^b PAF estimates adjusted for study site, age, income, illicit drug use, combined hormonal contraceptive use

^c PAF estimates adjusted for study site, age, income, history of trichomoniasis, endometriosis
