

Dissemination of macrolides, fusidic acid and mupirocin resistance among *Staphylococcus aureus* clinical isolates

SUPPLEMENTARY MATERIALS

Supplementary Figure 1: The electrophoretogram of 7 resistant determinants of macrolides, fusidic acid and mupirocin. The *ermA*, *ermB*, *ermC* and *erm33* were belonged to macrolides; *fusA1*, *fusA2* and *fusE* to fusidic acid; and *ileS1*, *ileS2* and *ileS3* to mupirocin.
