

a) AC Domain

b) RL4452

**Figure S2. Hierarchical clustering of the embryo and endosperm by expression patterns of probesets during seed maturation.** Hierarchical tree of clusters showing relationship between maturing embryo and endosperm of AC Domain (A) and RL4452 (B). The scale shows node height for a particular inter-node distance. Aem, AC Domain embryo; Aen, AC Domain endosperm; Rem, RL4452 embryo; Ren, RL4452 endosperm at 20, 30, 40 and 50 days after anthesis (DAA).
