WBC, white blood cell.

Data are presented as medians with ranges and were compared using the Kruskal-Wallis test.

$P < 0.05$  is regarded as significant. *Post-hoc* analysis was performed: \*C1 and C3 ( $P < 0.05$ ); <sup>†</sup>C2 and C3 ( $P < 0.05$ ); <sup>‡</sup>C3 and C4 ( $P < 0.05$ ).
