

THE LANCET

Supplementary appendix 2

This appendix formed part of the original submission and has been peer reviewed. We post it as supplied by the authors.

Supplement to: GBD 2016 Disease and Injury Incidence and Prevalence Collaborators. Global, regional, and national incidence, prevalence, and years lived with disability for 328 diseases and injuries for 195 countries, 1990–2016: a systematic analysis for the Global Burden of Disease Study 2016. *Lancet* 2017; **390**: 1211–59.

Supplementary Results to “Global, regional, and national incidence, prevalence, and years lived with disability for 328 diseases and injuries for 195 countries, 1990–2016: a systematic analysis for the Global Burden of Disease Study 2016”

This component of the appendix provides supplementary results for incidence, prevalence, and years of life lived with disability (YLDs).

Supplementary Results: Tables & Figures

SR Figure 1: All-cause years lived with disability (YLD) rate per capita by location and sex, 1990, 1995, 2000, 2005, 2010 and 2016, pg. 1

SR Figure 2: Co-evolution of age-standardised YLD rates per 100,000 for top-ten level 4 causes and the socio-demographic index (SDI), by GBD region, pg. 4

Figure 3: Leading 30 Level 4 causes of YLDs, by SDI quintile for 1990, 2006, and 2016, with mean percentage change in number of YLDs, and all-age and age-standardised YLD rates, pg. 14

SR Table 1: Global prevalence and incidence for 2016, percentage change in prevalence and incidence counts and age-standardized prevalence and incidence rates between 2006 and 2016 for all causes and nine impairments, pg. 19

SR Table 2: Global sequela-level prevalence, incidence and YLDs, all ages, 2006, 2016, pg. 25

SR Table 3: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of anemia by cause, all ages and both sexes combined, pg. 64

SR Table 4: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of developmental intellectual disability by cause, all ages and both sexes combined, pg. 65

SR Table 5: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of epilepsy by cause, all ages and both sexes combined, pg. 66

SR Table 6: Global prevalence and years lived with disability (YLDs) for 2016, percent change in counts, and percent change in age-standardised rates between 2005 and 2016 of Guillain-Barré syndrome by cause, all ages and both sexes, combined, pg. 67

SR Table 7: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of hearing loss by cause, all ages and both sexes combined, pg. 68

SR Table 8: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of heart failure by cause, all ages and both sexes combined, pg. 69

SR Table 9: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of infertility by cause, all ages and both sexes combined, pg. 70

SR Table 10: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of pelvic inflammatory disease by cause, all ages and both sexes combined, pg. 71

SR Table 11: Global prevalence and years lived with disability (YLDs) for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 of vision loss by cause, all ages and both sexes combined, pg. 72

SR Table 12: Global prevalence, incidence, and YLDs for 2016, percentage change of YLD counts and percentage change of YLD rates between 2006 and 2016 by cause, for each age group, separately, pg. 73

SR Table 13a-i: Global prevalence and YLDs for 2016, percentage change of YLD counts and percentage change of YLD rates between 2006 and 2016 by impairment and for each age group, separately, pg. 234

SR Table 14: Prevalence, incidence and YLDs for 2016, percentage change of YLD counts and percentage change of age-standardised YLD rates between 2006 and 2016 by cause and impairments, for all ages, for each location, separately, pg. 435

SR Table 15: Comparison of GBD 2016 and GLOBOCAN estimated cancer incidence by cause and sex, 2012, pg. 1800

SR Figure 1: Age-standardised all-cause years lived with disability (YLD) rate per capita by location and sex, 1990, 1995, 2000, 2005, 2010, and 2016

Causes are connected by arrows between time periods; solid lines are increases and dashed lines are decreases. For the time period 1990 to 2006 and for 2006 to 2016, three measures of change are shown: percentage change in the number of YLDs, percentage change in the all-age YLD rate, and percentage change in the age-standardised YLD rate. Communicable, maternal, neonatal, and nutritional disorders are shown in red, non-communicable causes in blue, and injuries in green.

Statistically significant changes are shown in bold. COPD=chronic obstructive pulmonary disease. YLDs=years lived with disability.

SR Figure 3: Leading 30 Level 4 causes of YLDs, low-middle SDI quintile for 1990, 2006, and 2016, with mean percentage change in number of YLDs, and all-age and age-standardised YLD rates

Causes are connected by arrows between time periods; solid lines are increases and dashed lines are decreases. For the time period 1990 to 2006 and for 2006 to 2016, three measures of change are shown: percentage change in the number of YLDs, percentage change in the all-age YLD rate, and percentage change in the age-standardised YLD rate. Communicable, maternal, neonatal, and nutritional disorders are shown in red, non-communicable causes in blue, and injuries in green.

Statistically significant changes are shown in bold. COPD=chronic obstructive pulmonary disease. YLDs=years lived with disability.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. YLDs for residual categories do not have prevalence estimates.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for certain NTDs and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.
