We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.

We did not calculate incidence for the nine impairments, certain NTDs, and causes with only birth prevalence. Blank cells mean that no estimate is available.

† Incidence for aggregate causes represents the sum of the incidence of the causes below the aggregate.

‡ Incidence estimates for stroke represent first-ever stroke only.

^ Incidence of HIV/AIDS represents new infections of HIV only and does not include new infections of Tuberculosis in HIV positive cases.
