

SUPPLEMENTARY TABLE S2. RESULTS FOR NECK, BODY, AND LEG MUSCLES

<i>Data from 5 patients</i>	<i>PAS side</i>		<i>PNS side</i>	
	<i>Change during PAS</i>	<i>Change during PAS and follow-up</i>	<i>Change during PNS</i>	<i>Change during PNS and follow-up</i>
Neck and body muscles	0.42 ± 0.32, <i>p</i> =0.74 (19 muscles)	0.31 ± 0.28, <i>p</i> =0.56 (19 muscles)	0.05 ± 0.25, <i>p</i> =0.41 (20 muscles)	-0.01 ± 0.17, <i>p</i> =0.59 (20 muscles)
Leg muscles	0.16 ± 0.07, <i>p</i> =0.13 (90 muscles)	0.24 ± 0.21, <i>p</i> =0.06 (90 muscles)	0.01 ± 0.14, <i>p</i> =0.65 (90 muscles)	0.15 ± 0.12, <i>p</i> =0.06 (90 muscles)

The analysis was done in the same way as for the hand muscles.  
 PAS, paired associative stimulation; PNS, peripheral nerve stimulation.
