

MiR-324-3p promotes tumor growth through targeting DACT1 and activation of Wnt/ β -catenin pathway in hepatocellular carcinoma

SUPPLEMENTARY MATERIALS

Supplementary Figure 1: DACT1 is frequently downregulated in HCC cell lines. Western blot analysis revealed that the expression of DACT1 protein in five HCC cell lines was significantly decreased compared to LO2 cells. $n =$ three repeats with similar results, *** $P < 0.001$ by ANOVA.
