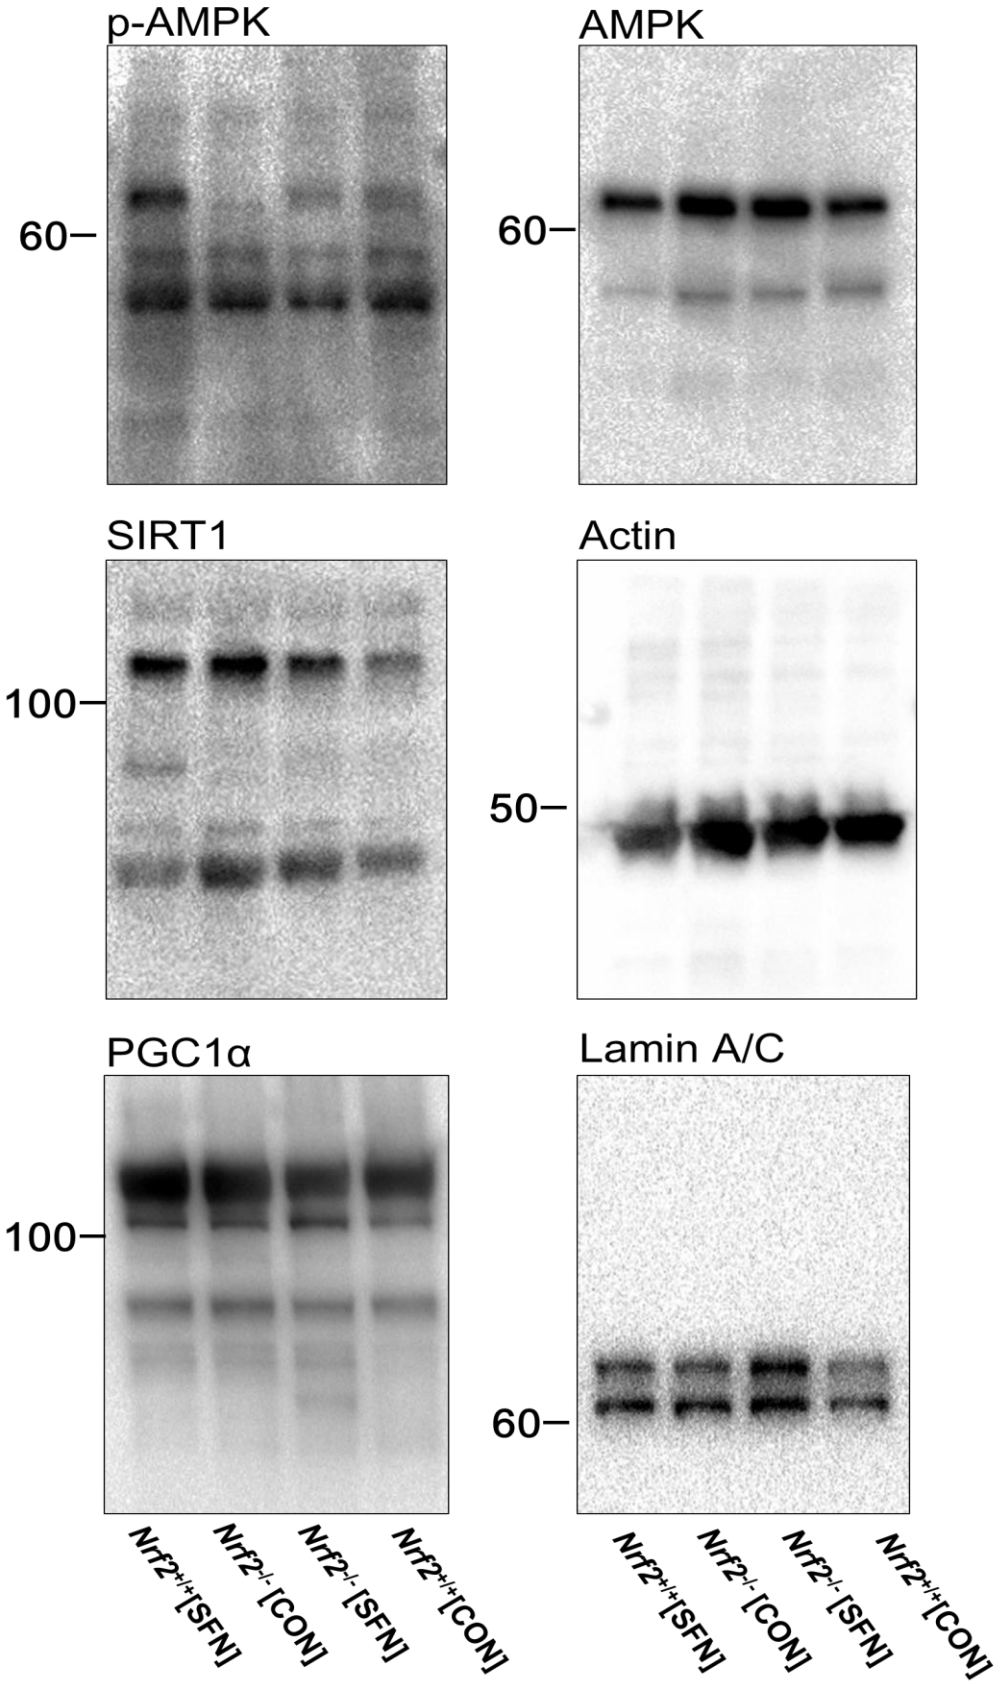
Supplementary figure S1.

Fig. S1. SFN-induced Nrf2-Luc activity detected using an In Vivo Imaging System and the results of genotyping in Nrf2 and OKD48 transgenic mice in the supine position. Time course of the Luciferase assay is shown (a) ~ (e)



Supplementary figure S2. Full-length image of figure 3 (A)

The origin of these panels is identical with figure 3 (A) showing western blotting with phosphor-AMPK, AMPK, SIRT1, Actin, PGC1α, and Lamin A/C antibody
