

Supplemental Figure 1. Effects of the gamma secretase inhibitor Compound E (GSI), inhibitory anti-NOTCH1 antibody (WC75), and inhibitory anti-NOTCH3 antibody (A4) on expression of Notch target genes in T-ALL cell lines. A. Effect of various inhibitors on *HES4* expression in NOTCH3-mutated TALL1 cells. B. Effect of various inhibitors on *DTX1* expression in TALL1 cells. C. Effects of GSI and A4 treatment on *DTX1* expression in NOTCH1-mutated CUTLL1 cells and TALL1 cells. D. Effects of GSI, WC75, and A4 on *DTX1* expression in NOTCH1-mutated DND-41 cells.
