

SUPPLEMENTARY FIG. S7. Monitoring of mice weight during therapy study. Mouse weights were recorded of groups of 7–8 male NOD/SCID mice bearing LnCap tumors treated twice a week for 4 weeks with saline (*red circles*), cys-DB-LNP plus Dox-LNP (*orange squares*) or cys-DB-LNP plus MMAE-LNP (*green triangles*). cys-DB, cys-diabody; LNP, lipid nanoparticle; NOD/SCID, non-obese diabetic severe combined immune deficiency.
