**SUPPLEMENTARY FIG. S4.** **(A)** Connectogram of 100 most informative features from RF and CRF models. The connections from the RF model were taken from Chen and colleagues (2015). Red connections: RF model only, blue: CRF model only, black: features from both RF and CRF. There were 32 anatomically identical features that were shared by both models with slightly varying degrees of importance depending on the model. **(B)** The 20 most informative features from RF and CRF using the same color scheme **(A)**. Only four identical features were selected by both RF and CRF. CRF, conditional random forest; RF, random forest.

SUPPLEMENTARY FIG. S4. (Continued).
