

**Supplementary Table.** Incidence rates of clinical outcomes per 100 person-years according to tertiles of serum SAA concentrations

SAA Tertiles	ESRD		All-Cause Mortality	
	Events/ Person-Years	Incidence (95% CI) <sup>a</sup>	Events/ Person-Years	Incidence (95% CI) <sup>a</sup>
1	28 / 1073	2.6 (3.6 -1.7)	47/1237	3.8 (4.9-2.7)
2	20 / 1329	1.5 (2.2 -0.9)	38/1446	2.6 (3.5-1.8)
3	27/1307	2.1 (2.8-1.3)	39/1466	2.7 (3.5-1.8)

<sup>a</sup>per 100 person-years

Range of SAA concentrations in each tertile are; tertile 1 < 0.937 mg/mL; tertile 2, ≥0.937 - <1.62 mg/L; tertile 3 ≥1.62 mg/L.
