

E-cadherin expression as a prognostic factor in patients with ovarian cancer: a meta-analysis

Supplementary Materials

Supplementary Figure 1: Forest plot shows the relation of negative E-cadherin expression with PFS of patients with ovarian cancer.

Supplementary Figure 2: Begg's and Egger's funnel plot evaluated the publication bias of the selected studies.

Supplementary Table 1: Quality assessment of studies (for cohort studies)

Studyid	Selection				Comparability		Outcome		Total Points
	Representativeness of the Exposed Cohort	Selection of the Non-Exposed Cohort	Ascertainment of Exposure	Demonstration That Outcome of Interest Was Not Present at Start of Study	Comparability of Cohorts on the Basis of the Design or Analysis	Assessment of Outcome	Was Follow-Up Long Enough for Outcomes to Occur	Adequacy of Follow Up of Cohorts
