

Supplementary Data

Table S1

Regression ^a coefficients (beta), standard errors (SE) and *P*-values for the Asian dust (AD) indicator variable, pollen concentration, interaction between AD and pollen, suspended particulate matter (SPM) and interaction between AD and SPM, by each clinic in Fukuoka City, Japan.

Clinic and lag period for AD ^b	AD			Pollen ^c			AD × Pollen interaction

^a Adjusted for the day of the week, public holidays, month, year, and the natural cubic splines of daily mean temperature and relative humidity with 3 degrees of freedom.

^b Delayed effects longer than a day were constrained as mean.

^c Cubic-root transformed.
