

## The long non-coding RNA *PARTICLE* is associated with *WWOX* and the absence of *FRA16D* breakage in osteosarcoma patients

### SUPPLEMENTARY MATERIALS

**Supplementary Figure 1: *PARTICLE* expression in osteosarcoma cell lines.** (Related to Figure 2) Representative epifluorescence microscopic images of MG63 (A), SJSA (B), and U2OS (C) labelled with *in situ* hybridization probes (Quasar 570 (red)) specific for *PARTICLE* (left). Nuclei stained with DAPI (blue, middle). Merged images (right). Scale bar 10  $\mu$ m.
