

Supplemental Table for:  
Adipose-derived Fatty Acid-Binding Proteins Plasma Concentrations Are Increased in Breast Cancer Patients  
Sandra Guaita-Esteruelas et al.

**Table S1:** Linear regression analysis of FABP4 and FABP5 with breast cancer (model 6, table 4)

	FABP4		FABP5	
	beta	p value	beta	p value
BC	4.86	<0,0001	0.88	<0,05
Age	0.079	0.080	0.023	0.235
BMI	0.62	<0,0001	0.09	0.048
hsCRP	0.54	<0,05	0.045	0.508
Non-HDLc	-0.165	0.78	-0.119	0.644
TG	1.039	0.055	0.523	<0,05

Beta unstandardized coefficients. BC, Breast cancer; BMI, body mass index; hsCRP, high-sensitivity C-reactive protein, Non-HDLc, non-HDL cholesterol; TG, triglycerides
