

Description of Additional Supplementary Files

File Name: Supplementary Movie 1

Description: A morph between basal arrestin and active arrestin highlights how different conformations are available to effectors. The N-domain is in blue, the C-domain is in grey, the receptor-binding ridge and finger loop is in green, arrestin switch regions are in orange, and the register-shifted β -strand is in magenta.

File Name: Supplementary Movie 2

Description: A morph between basal and active arrestin after a 180° rotation around the y-axis.
