Dr. Drager,

Please accept this note as our permission for you to modify and publish a figure from RESPIRATORY CARE in the manner described in your email below. Have a great day.

Ray Masferrer
Managing Editor, RESPIRATORY CARE

Assunto:Question - Figure Respiratory Care

De:Luciano Drager <luciano.drager@incor.usp.br>
Para:jeanette.chawdhury@AARC.ORG, Sairam Parthasarathy <sparthasarathy@deptofmed.arizona.edu>

Hi Jeanette,

I hope this e-mail will find you well. I need an assistance from you:

My name is Luciano Drager, Associate Professor of Medicine at University of Sao Paulo, Brazil.

We are finishing a review paper discussing the impact of the recent trials in the management of OSA and CSA. The paper is almost accept in

Circulation.

We included a figure describing the Servo ventilator principle. I was inspired by a figure from a colleague (Prof. Sairam Parthasarathy - copied here) in the following site:

https://www.researchgate.net/publication/46034323_CPAP_and_Bi-level_PAP_therapy_New_and_established_roles

An illustrator from Circulation made changes in the figure in order to not copy the figure, just the principle. I contacted Dr Sairam that recommended me to contact Respiratory Care Journal. Please let me know if I can publish the figure and mentioned in the legend something like:

"Modification with permission from Respiratory Care" and reference Sairam's paper.

Thank you so much for your attention.

Luciano
