

## Prognostic evaluation of platelet to lymphocyte ratio in patients with colorectal cancer

### SUPPLEMENTARY MATERIALS

**Supplementary Table 1: The five greatest c-index values of different cut-off values for PLR for predicting prognosis in CRC patients from CMU-SO**

Survival	Cut-off	c-index	N	Survival	Cut-off	c-index	N
OS	130	0.5494	1018/827	CSS	130	0.5553	1018/827
	132	0.5481	1048/797		129	0.5543	1006/839
	129	0.5481	1006/839		132	0.5539	1048/797
	131	0.5470	1036/809		131	0.5530	1036/809
	133	0.5462	1067/778		127	0.5525	978/867

CSS: cancer-specific survival; CMU-SO: Department of Surgical Oncology at The First Hospital of China Medical University; N: number of patients for each group; OS: overall survival; PLR: platelet to lymphocyte ratio.
