Odorant binding protein 2

(Protein Accession Number: S5R7H8; Peptides Sequence: gTDEcDTAFQIR)

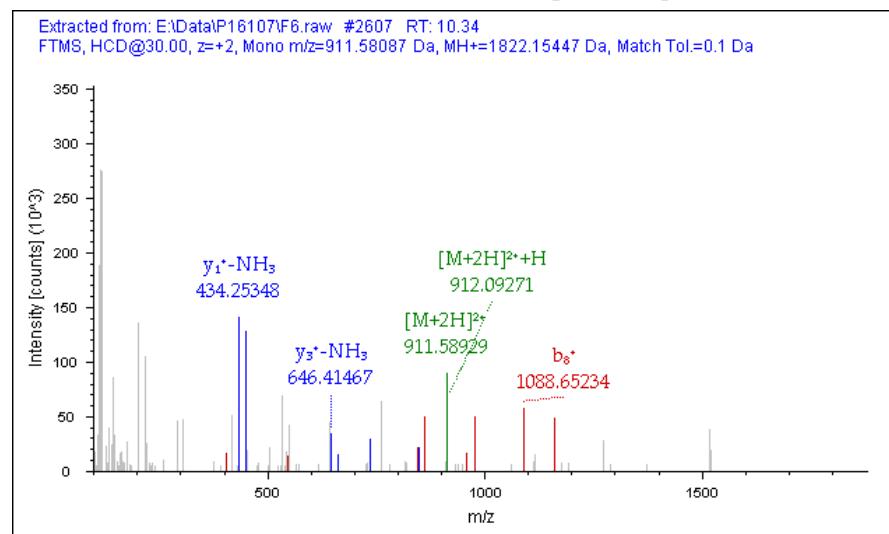

Odorant binding protein 69a

(Protein Accession Number: A0A0G2UEV0; Peptides Sequence: aTGELPNNQNLk)

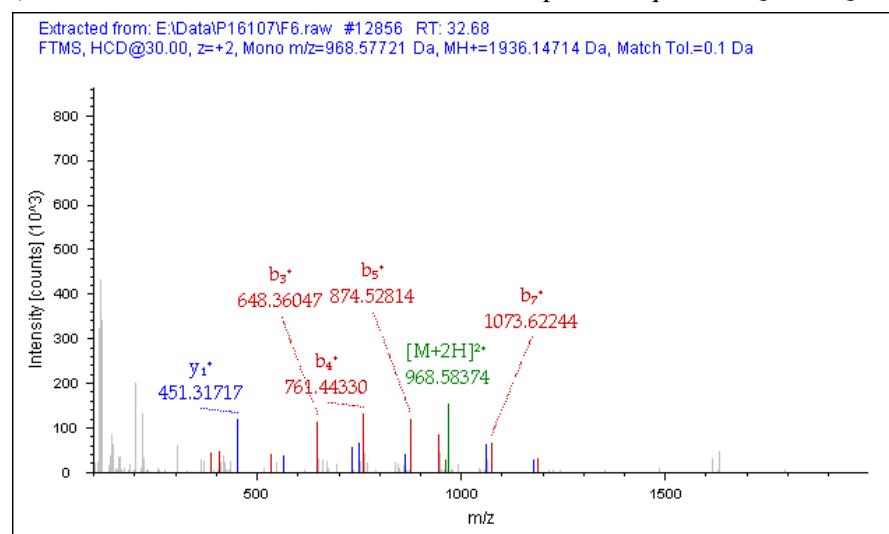

Odorant receptor 94b

(Protein Accession Number: A0A0G2UEY4; Peptides Sequence: tASANIIIAVLk)

Odorant binding protein 44a

(Protein Accession Number: A0A0G3Z7T5; Peptides Sequence: tQNLIAQLGQNk)

Putative odorant-binding protein A5

(Protein Accession Number: A0A034WGF4; Peptides Sequence: kYDMELVAGNIIFTSR)

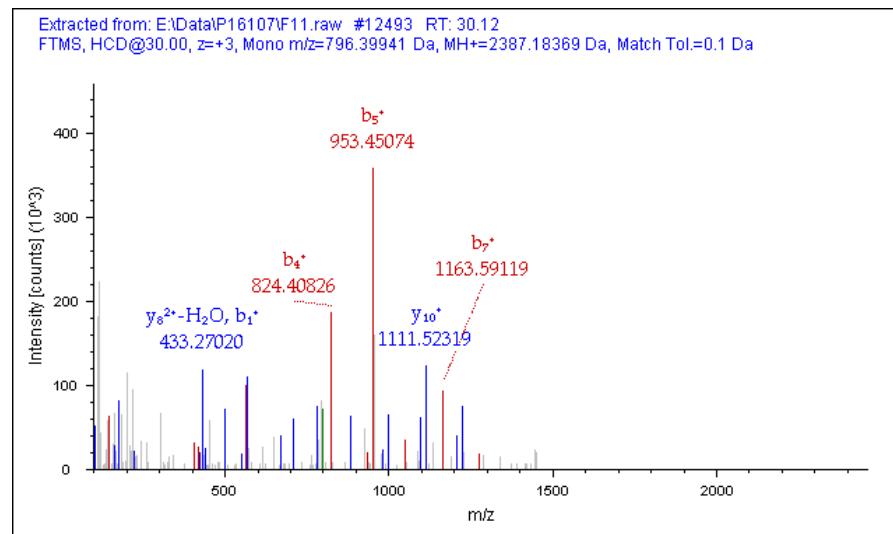

Figure S1. Representative MS spectrum of eight peptides

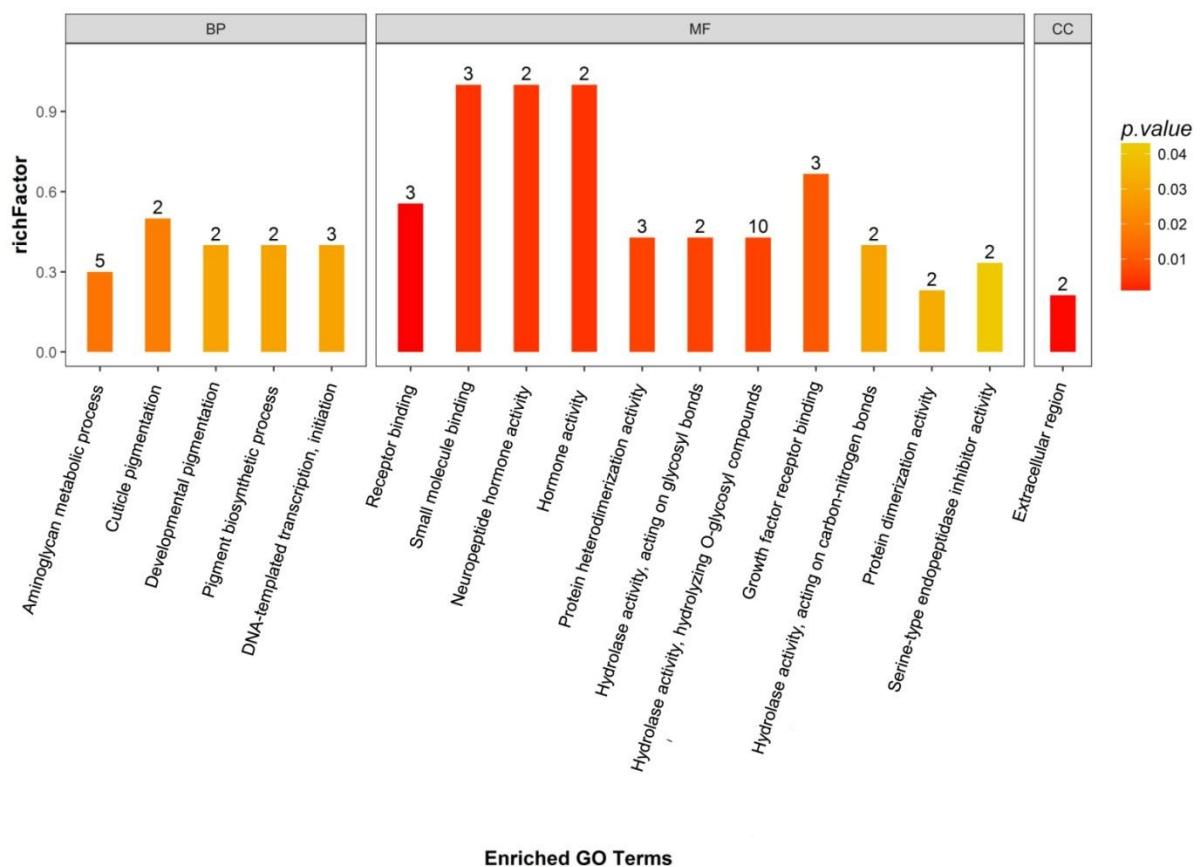

Figure S2. GO enrichment analysis of differentially expressed proteins between the responsiveness and non-responsiveness male flies' antenna. The x-axis represents the name of the GO terms, and y-axis represents the rich factor. The numbers on the columns represent the protein number. The color of column represents the corresponding p-value, and a corrected p-value < 0.05 were considered the most significant functional subcategories.

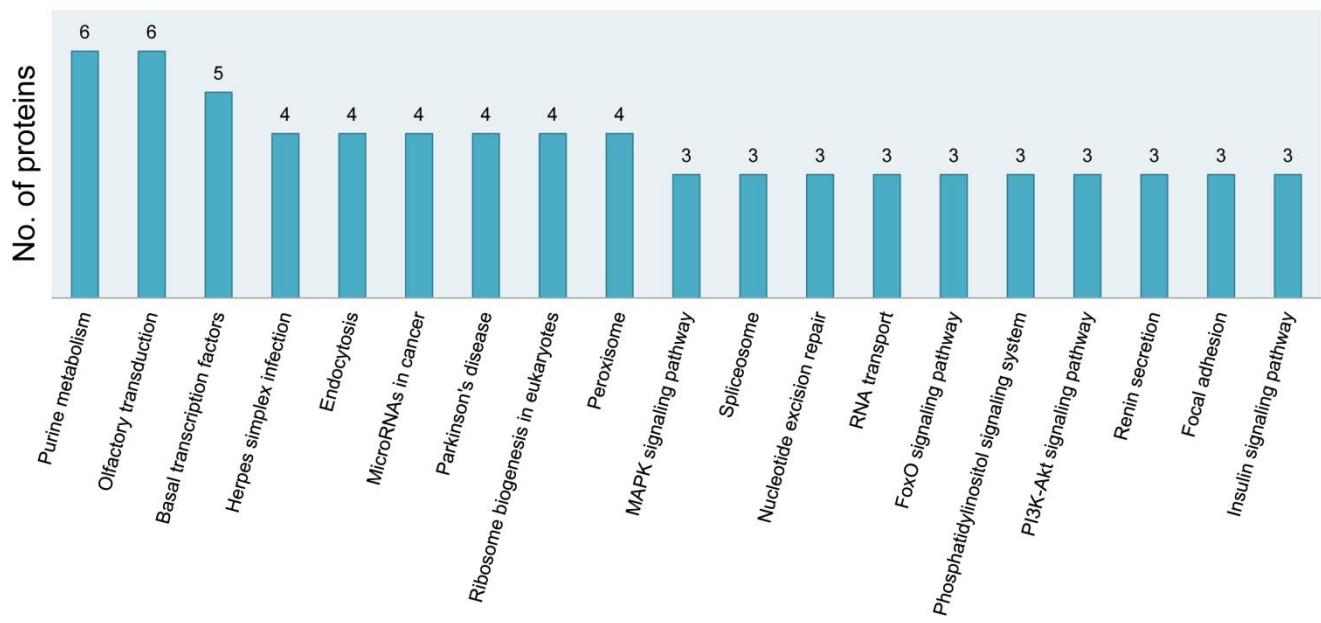

Figure S3. The most represented KEGG pathways in *B.dorsalis* proteome. The *x*-axis represents the name of the pathways, and the *y*-axis represents the protein number.
