

Table S2. Concordance between ATI reports for kidneys from the same donor

		Right Kidney				
		No ATI*	Mild ATI	Severe ATI	Missing	Total
Left Kidney	No ATI	406	5	5	6	422
	Mild ATI	6	82	5	1	94
	Severe ATI	1	8	36	2	47
	Missing	14	4	0	0	18
	Total	427	99	46	9	581

ATI, Acute Tubular Injury. Severe ATI includes both moderate and severe ATI according to the pathology report. Agreement between right and left reports was 95% [expected 60%, Kappa 0.87 (P<0.001); calculated when reports were available in both kidneys (n=554)].

*Donors were reclassified into the higher ATI grade for all other study analyses in cases of disagreement between the right and left kidneys.
