

**Supplemental Figure S1: PhyloPhiAn phylogeny of nongonococcal urethritis isolates and selected reference isolates from Bennett et al. (2012).** Reference isolates denoted in blue; nongonococcal urethritis isolates denoted in red.

**Supplemental Figure S2: Neighbor-joining nucleotide phylogeny of *aniA*.**

Alleles of *aniA* were aligned using MAFFT. Isolates with frameshifted *aniA* are denoted in red; isolates with full-length *aniA* are denoted in blue. The clade outlined in green contains *aniA* of putative gonococcal origin. Ng WHO\_W is a reference *aniA* allele from a gonococcal strain.

### **Supplementary Table 1: Accession Numbers**

<b>Sample</b>	<b>Accession Number</b>
NIUS07-1	NGBO00000000
NmJP04-1	NGBN00000000
NmJP05-1	NGBM00000000
NmJP05-2	NGBL00000000
NmJP05-3	NGBK00000000
NmJP06-1	NGBJ00000000
