

**S3 Levels of selected pro- and anti-apoptotic proteins in PC-3 and LNCaP cells treated with LA-12/cisplatin and TRAIL.** The level of Bak, Bax, Bcl-2, Bcl-xL and XIAP in PC-3 and LNCaP cells pretreated (24 h) with LA-12 (0.5/2.5  $\mu$ M) or cisplatin (10/5  $\mu$ M) and treated (4 h) with TRAIL (5/20 ng/ml), respectively, detected by Western blotting.  $\beta$ -actin served as a loading control. Results are representative of at least three independent experiments.
