

Role of miR-429 on pancreatic cancer

Supplementary Figure 1. (A) The protein expression level of PDCD4 in SW1990/GZ cells infected with lentivirus expressing either shPDCD4 or scramble shRNA for 72 h were measured by western blot. (B) Expression level of PDCD4 in tumor tissues were determined by western blot.

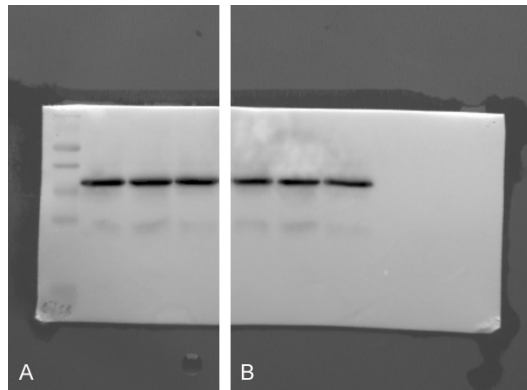

Supplementary Figure 2. (A) Western blot analysis of the expression levels of PDCD4 in SW1990 and SW1990/GZ cells. (B) SW1990/GZ cells were transfected with the precursor oligonucleotides (pre-miR-429 and scramble). PDCD4 protein levels were determined by western blot analysis.

Supplementary Figure 3. (A) The blot of GAPDH in SW1990/GZ cells were transfected with the precursor oligonucleotides (pre-miR-429 and scramble) (Figure 2). (B) The blot of GAPDH in SW1990 and SW1990/GZ cells (Figure 1).

Role of miR-429 on pancreatic cancer

Supplementary Figure 4. (A) The blot of GAPDH in in SW1990/GZ cells infected with lentivirus expressing either shPDCD4 or scramble shRNA for 72 h (**Figure 3**). (B) The blot of GAPDH in tumor tissues (**Figure 4**).
