

Supplementary information

Table S1. Parameters of pulsed electric fields applied to burn wounds to modify scar formation as described in ref²³. 3 repeats per each wound.

Voltage (V)	Number of pulses (N)	Treatment frequency (days)	Scar_Area	Hom	DOPslope
Normal skin			100	100	100
Untreated burn			0	0	0
125	200	10	16	14	26
125	400	20	17	29	19
125	800	30	19	14	16
250	200	20	58	57	37
250	400	30	24	14	23
250	800	10	50	14	26
500	200	30	26	29	33
500	400	10	29	-29	19
500	800	20	32	-21	26

Table S2. Coefficients of the linear model based on OFDI measurements at Month 1. (n=36 wounds, 9 animals, OFDI data acquired from 2-3 volumes from each wound).

	Scar Area (α_1)	Hom (γ_1)	DOPslope (δ_1)	Intercept (β_0)
count	36	36	36	36
