Supplementary Table 5. Sample preparation for HPLC analysis of the alkamides in the extracts from R and SL samples (CSL: stem/leaves extract from control plants; ISL: stem/leaves extract from infected plants; CR: root extract from control plants; IR: root extract from infected plants).

Sample	Fresh weight (g)	Dry weight (g)	<i>n</i>-hexane extract (mg)
C R	2.53	0.28	7.8
I R	1.90	0.24	2.4
C SL	5.90	1.26	17.4
I SL	4.12	0.92	11.2
