

Fluid Balance

...../...../.....

Patient details (or affix label)		Time (hour starting)	INPUT (ml)					OUTPUT (ml)				
			Oral fluid	IV fluid	Blood	Other e.g. NG, IV drugs, TPN	Running Total	Urine	Drain	Aspirate	Other e.g. Stoma	Running Total
Surname:		00:00										
		01:00										
First Names:		02:00										
		03:00										
Hospital Number:		04:00										
		05:00										
		6 hour total										
D.O.B.:		06:00										
		07:00										
		08:00										
		09:00										
		10:00										
		11:00										
If Urine Output < 0.5ml/kg/hr for > 6 consecutive hours bleep medical team urgently		12 hour total										
		12:00										
		13:00										
		14:00										
Patients weight:		15:00										
Actual: <input type="text"/>		16:00										
Estimated: <input type="text"/>		17:00										
		18 hour total										
Expected hourly urine output (0.5ml/kg/hour)	ml	18:00										
		19:00										
		20:00										
		21:00										
Example: expected hourly urine output in 60kg patient: 60 x 0.5 = 30ml/hour		22:00										
		23:00										
		24 hour total
