Supplementary Data

Number of Supplementary Figures: 1 Number of Supplementary Tables: 1

Supplementary Figure S1. Functional status of pancreatic islet microvascular vasomotion in three-week-old SHRs and WKYs. (A) Functional status of pancreatic islet microvascular vasomotion in three-week-old WKYs. (B) Functional status of pancreatic islet microvascular vasomotion in three-week-old SHRs. The dynamic velocity of microvascular blood flow was shown in the rectangular insert. The microvascular blood perfusion between the dashed lines (5 s) was extracted in the square insert. The red line represents microvascular blood perfusion data of three-week-old WKYs; the blue line represents perfusion data of three-week-old SHRs; PU, perfusion unit. (C) Distribution patterns of pancreatic islet microvascular blood perfusion in three-week-old WKYs and SHRs. The distribution pattern was analyzed using microvascular blood perfusion data derived from laser Doppler monitoring. Three-week-old WKYs and SHRs showed similar blood perfusion pattern. Red dots, microvascular blood perfusion of threeweek-old WKYs. Blue dots, microvascular blood perfusion of three-week-old SHRs. PU, perfusion unit. (D-G) Quantification analysis of functional status of pancreatic islet microvascular vasomotion in three-week-old WKYs and SHRs. No significantly differences were found in pancreatic islet microvascular vasomotion parameters (including average blood perfusion, amplitude, relative velocity and frequency) between three-week-old WKYs and SHRs.

Groups	WKYs	SHRs
	(<i>n</i> = 6)	(<i>n</i> = 6)
Age (weeks)	3	3
Gender (male / female)	6/0	6/0
Body weight (g)	39.5 ±1.3	42.7 ± 1.5
FPG (mg/dL)	65.5 ±4.4	62.4 ±2.2
Blood pressure (mmHg)		
SBP	109.0 ± 1.5	128.0 ± 1.7 **
DBP	74.7 ± 6.0	89.7 ± 0.3
MAP	94.7 ±6.1	107.3 ± 1.5

Supplementary Table S1 Body weight, blood glucose and blood pressure of three-weekold WKYs and SHRs

Unless indicated otherwise, numbers were expressed as the mean \pm S.E.M. (*n* = 6 in each group). FPG, fasting plasma glucose; SBP, systolic blood pressure; DBP, diastolic blood pressure; MAP, mean arterial pressure.**, *P* < 0.01 compared with WKYs.
