Sup Fig. 4
Analysis of stomatal and non-stomatal limitation
(A) Stomatal limitation (B) non-stomatal limitation and (C) V_{cmax} normalized for leaf thickness and porosity in col-0, RBCS$_{pro}$:KRP1, ATML1$_{pro}$:KRP1 and CA1$_{pro}$:RBRi leaves, as indicated. Values are means, error bars = sem. n > 6. Samples were compared with ANOVA followed by a post-hoc Tukey test. Columns indicated by identical letters within each analysis cannot be distinguished from each other at the 0.05 confidence limit.
