Table of Contents:

Structures of β -lactams used in this study.....	S2
MIC values for NDM Variants with Various Antibiotics.....	S3
UV-Vis Spectra of Dicobalt(II) NDM Variants.....	S9
$^1\text{H-NMR}$ Spectrum of Zn(II)Co(II) NDM-1 variants.....	S10
Primers Used For Site-Directed Mutagenesis.....	S11

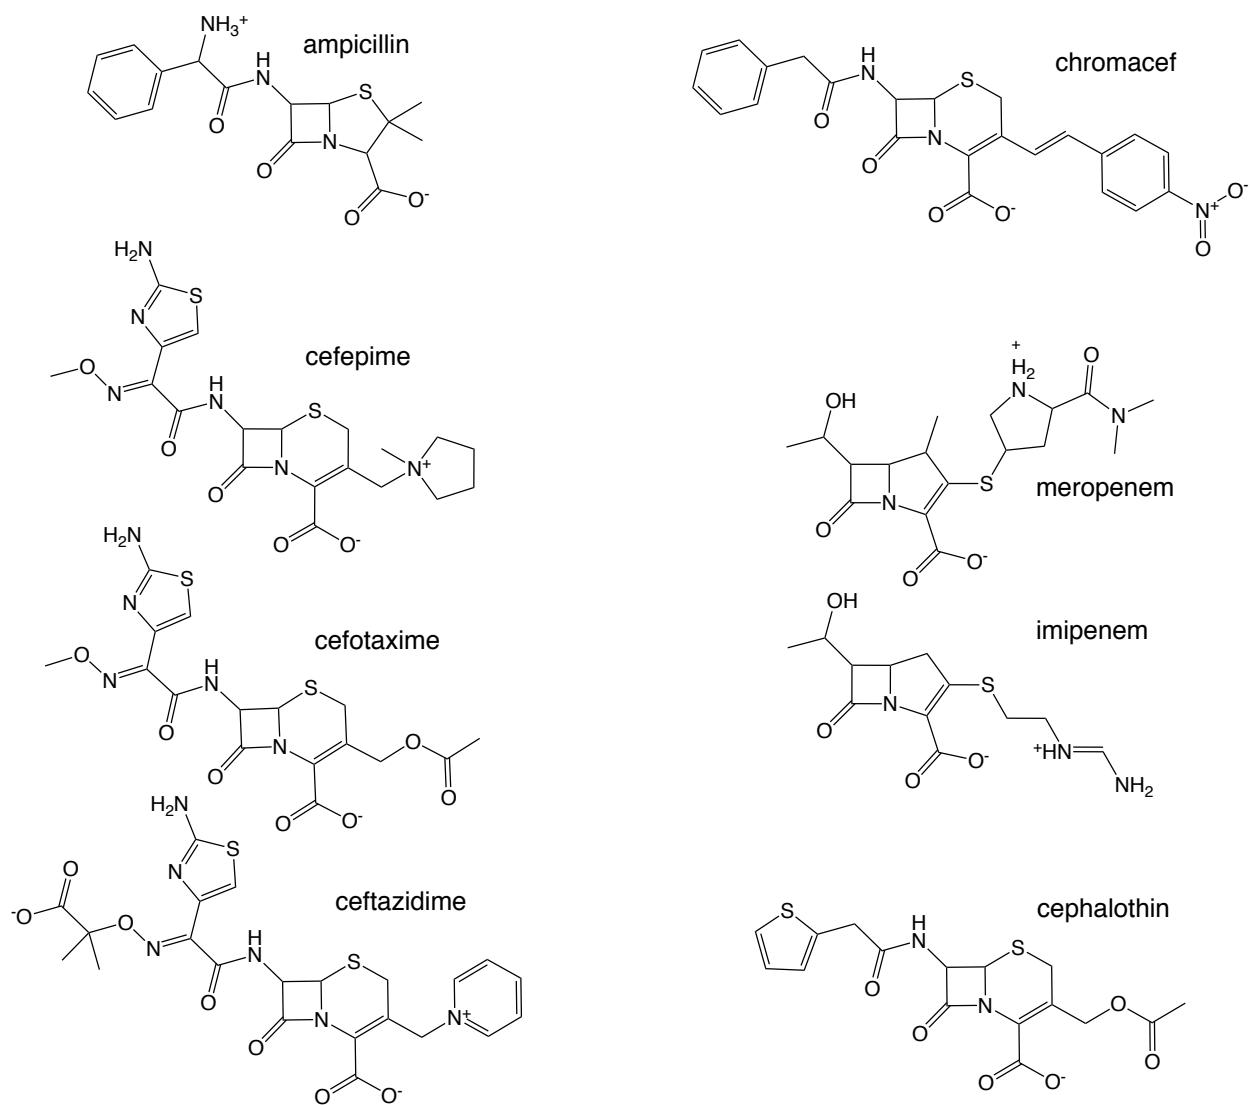

Figure S1. Structures of β -lactams used in this study

Table S1. MIC values for imipenem with NDM variants substituted at position 154 in standard and zinc(II) limited conditions

Strain	MIC (mg/L) Standard Conditions ^a	MIC (mg/L) EDTA (50 µM) ^a
pHSG298	0.25	0.25
NDM 154M	64	0.5
NDM 154L	64	4
NDM 154I	64	0.5
NDM 154F	64	0.5
NDM 154V	64	1
NDM 154W	16	0.25

^aResults from two biological replicates

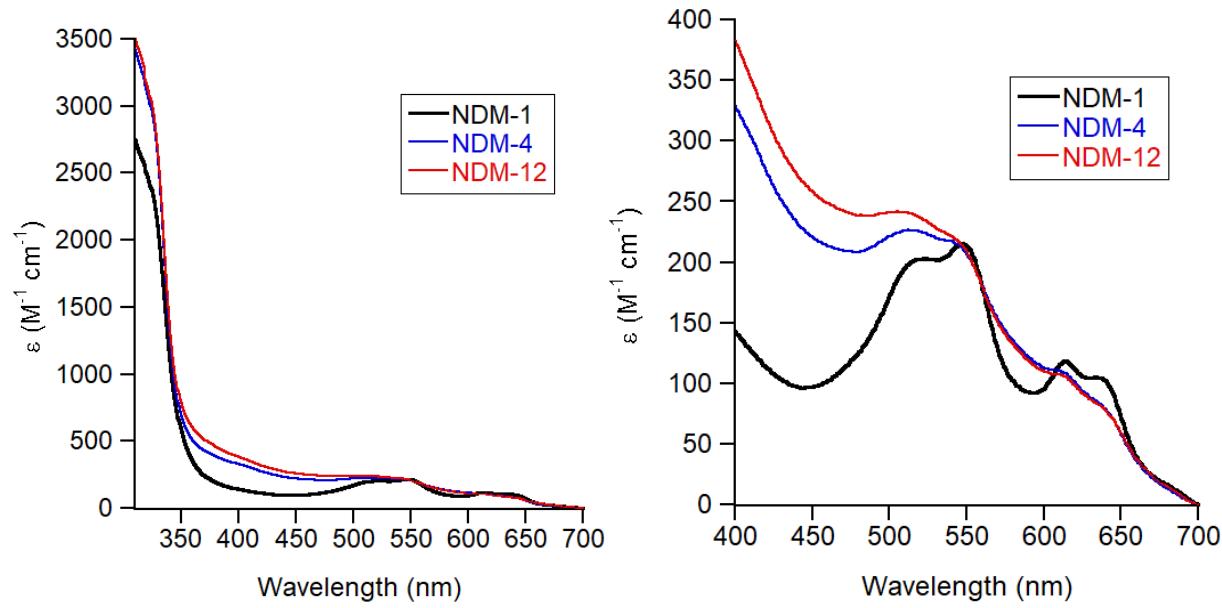

Figure S2. UV-visible spectra of dicobalt(II) NDM variants. (Left) full spectra, (Right), expansion of the ligand-field region. Each spectrum is blanked against buffer.

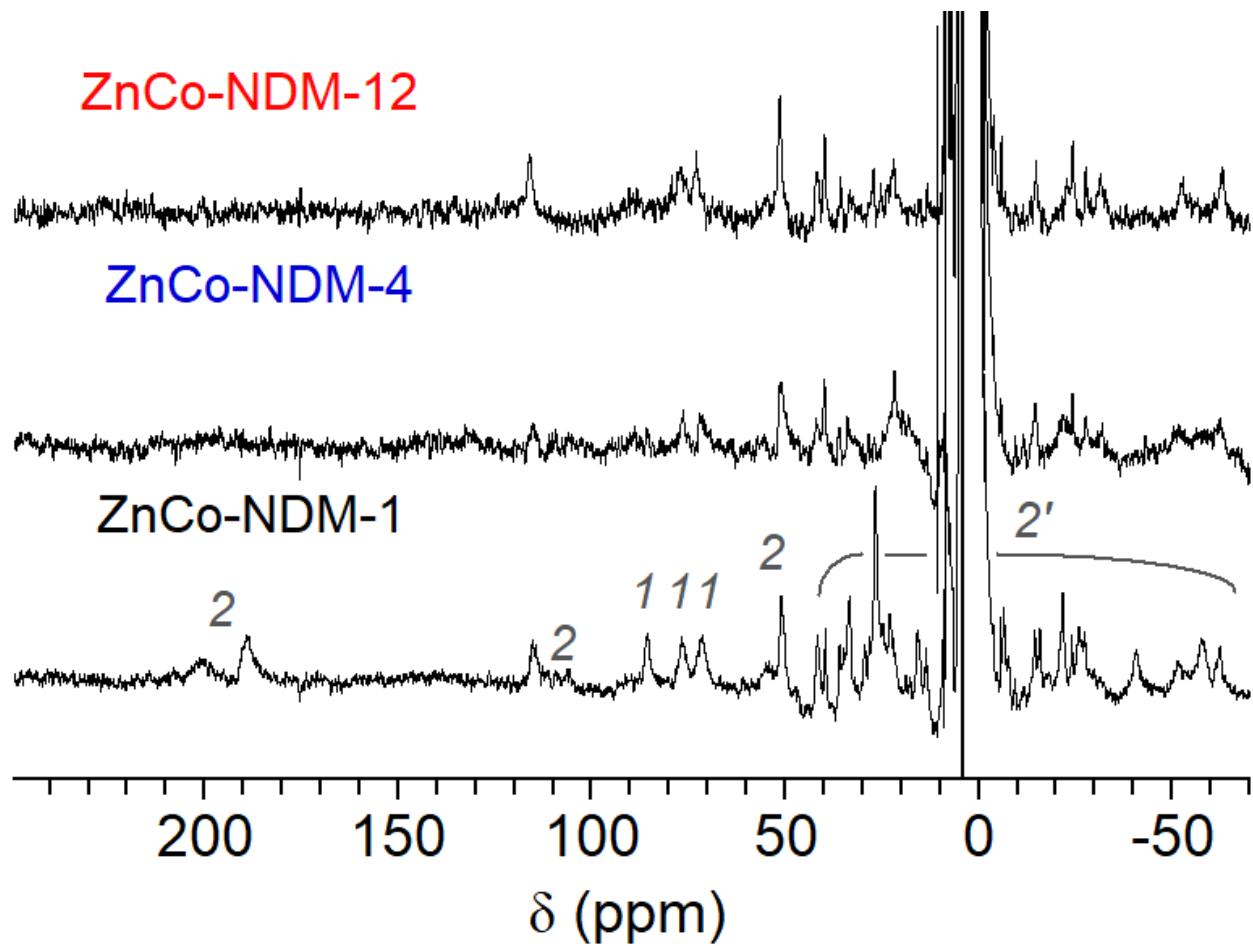

Figure S3. 300 MHz ^1H NMR spectra of the zinc(II)cobalt(II) NDM variants. The labels above the NDM-1 spectrum follow from Figure 7.

Mutagenic Primers Encoding NDM-4 and NDM-12

The template DNA used for preparation of each mutated *bla*_{NDM} gene (*bla*, β-lactamase) is noted and the mutated codons are underlined. Briefly, a plasmid encoding NDM-1 using codons optimized for expression in *E. coli* was the template for construction of NDM-4. The resulting NDM-4 encoding plasmid was used to generate a plasmid encoding NDM-12. These constructs were used to express NDM variants used for kinetic and spectroscopic experiments.

Table S7. Oligonucleotide Sequences Used for Site-Directed Mutagenesis

Construct	Primer Sequences
NDM-4 M154L (template <i>bla</i> _{NDM-1})	F: 5' -GCCCGCAAGAGGGCT <u>GGTTGCGCGAAC</u> -3' R: 5' -GTTGCCGCAACC <u>AGCCCCTTGC</u> GGGC-3'
NDM-12 M154L, G222D (template <i>bla</i> _{NDM-4})	F: 5' -GCTCGGAATCTC <u>GATGATGCCGACACTG</u> -3' R: 5' -CAGTGTGGCAT <u>CGAGATTGCCGAGC</u> -3'

Mutagenic Primers Encoding Variants at the M154 Position

Table S8. Primer sequences used to generate variants at the NDM154 position for use in MIC determinations. Complimentary sequences are not shown.

Primer	Sequence (5' - 3')
NDM 154S	AAGAGGGTCGGTTGCGCGCAA
NDM 154P	AAGAGGGCCGGTTGCGCGCAA
NDM 154T	AAGAGGGACGGTTGCGCGCAA
NDM 154A	AAGAGGGGCGGTTGCGCGCAA
NDM 154Y	AAGAGGGTACGTTGCGCGCAA
NDM 154H	AAGAGGGCACGTTGCGCGCAA
NDM 154N	AAGAGGGAACGTTGCGCGCAA
NDM 154D	AAGAGGGGACGTTGCGCGCAA
NDM 154C	AAGAGGGTGCGTTGCGCGCAA
NDM 154R	AAGAGGGCGCGTTGCGCGCAA
NDM 154VTG	GCAAGAGGGVTGGTTGCGCGAAC
NDM 154DTC	GCAAGAGGGDTGTTGCGCGAAC
NDM 154BGG	GCAAGAGGGBGGTTGCGCGAAC
NDM 154VAG	GCAAGAGGGVAGGTTGCGCGAAC
