

Table. Y Chromosome DNA positivity in women who last reported vaginal sex >7 days ago.

| Reported sexual behavior | Y chromosome | | Trend (<i>p</i> -value) |
|--|--------------|-----------------------|-----------------------------|
| | Total N | DNA positive n (%) | |
| Condom use | | | 0.76 |
| Never (0%) | 8 | 2 (25%) | |
| Rarely/Sometimes/Most times (1-99%) ^a | 22 | 2 (9%) | |
| Always (100%) | 13 | 2 (15%) | |
| Average frequency of vaginal sex acts with HITCH partner (/week) | | | 0.28 |
| <=2 | 30 | 3 (10%) | |
| >2-4 | 10 | 2 (20%) | |
| >4 | 3 | 1 (33%) | |
| Proportion of sex encounters where woman received oral sex from male HITCH partner | | | 0.02 |
| Never (0%) | 6 | 0 (0%) | |
| Rarely (1-25%) | 13 | 0 (0%) | |
| Sometimes (26-75%) | 17 | 3 (18%) | |
| Most times (76-99%) | 7 | 2 (29%) | |
| Always (100%) | 2 | 1 (50%) | |
| Proportion of sex encounters where woman received digital sex from male HITCH partner | | | 0.03 |
| Never (0%) | 0 | 0 | |
| Rarely (1-25%) | 5 | 0 (0%) | |
| Sometimes (26-75%) | 16 | 1 (6%) | |
| Most times (76-99%) | 17 | 2 (12%) | |
| Always (100%) | 7 | 3 (43%) | |

^a Combines women who reported using condoms rarely, sometimes, and most times.
