

Additional file 5: Figure S4. Dynamics of IAA/BR induction. Expression of *SAUR9* and *SAUR10* after 4h of IAA/BR treatment in 10-day old seedlings, and transcript decrease after subsequent replacement of the induction medium by control medium (0.5 MS). No IAA/BR: Seedlings grown for 4 hrs in liquid control medium, 4h IAA/BR: seedlings grown for 4 hrs in IAA/BR medium. 1h after: seedlings grown for 4h in IAA/BR and subsequently for 1h in control medium. 4h after: seedlings grown for 4h in IAA/BR and subsequently for 4h in control medium. The error bars represent the SE based on three biological replicas.
