

Additional file 6: Figure S5. Response of *SAUR10*clade genes to GA application. Expression of the *SAUR10* clade genes in seedlings after 4 hours of 100 μ M GA3 treatment relative to the expression in mock treated seedlings. The error bars represent the SE based on three or four biological replicas. Significant differences (t-test, $p < 0.05$) are indicated with an asterisk.
