

Dear colleague,

This questionnaire for medical doctors is part of a study on *Toxoplasma gondii* in Nigeria.

We kindly ask you for your time and sincere opinions: please fill in this questionnaire based on your current knowledge, without using any external information sources. By doing so, you give permission to use the answers for research purposes.

We plan to include a summary of the results in an international research publication. The results will be reported so that an individual participant cannot be recognized. The new information gathered will also help to evaluate the needs for continued professional education.

Please **circle** your answers from the options given. You may select several answers for each question.

Sex	Female	Male	
Years of experience in the medical field	< 5	5-10	>10
