

SUPPLEMENTAL MATERIALS

Supplemental Figure Legends

Supplemental Figure 1. **(A)** Network of regulators controlling *RNR1* expression from the Saccharomyces Genome Database (1). *SIN4* is a synonym for *MED16*. **(B)** Changes in *RNR1* expression (log₂ mRNA ratio) in each regulator mutant that binds to the *RNR1* promoter or coding region (indicated by asterisk), based on published ChIP-chip data. Each regulator is grouped by protein complex membership or functional category.
