

**S3 Table. Target stability function analysis of the three reference genes using the Bio-Rad CFX manager 3.1 software system.**

Target reference gene	Coefficient Variance	M Value
Rplp1	<b>0,1621</b>	<b>0,4092</b>
Tbp	<b>0,1243</b>	<b>0,3205</b>
Hsp90ab1	<b>0,1194</b>	<b>0,3184</b>

This function uses an iterative test of pairwise validation described by (Vandesompele et al., 2002). Recommended coefficient variance should be <0.25 and M value should be <0.5 for homogenous samples.
