

Supplemental Figure S16. Biallelic expression of a X-linked gene in a single-cell (scRNA-Seq). Biallelic expression of three heterozygous SNPs in the X-linked gene *DGCR2* (ENSACAG00000002669) in one brain cell of a female specimen. Two SNPs (2, 3) are located in the 5'UTR, a third SNP (1) is present in the coding region of exon 2 (at third codon position).
