

Supplementary Table 2: Significant predictors of any improvement to botulinum toxin A treatments with respect to migraine, photophobia, and dry eye severity

Factor	Odds Ratio	95% confidence interval	p-value
<i>Improvement in Photophobia Severity*</i>			
Age	1.08	[1.03, 1.14]	0.001
Hypertension	3.14	[1.05, 9.36]	0.041
Depression	2.92	[1.12, 7.59]	0.028
<i>Improvement in Dry Eye Severity*</i>			
Age	1.07	[1.02, 1.12]	0.007

*Improvement defined as those responding either “a little better,” “better,” or “much better”
