

Supplementary Figure S4. Prediction-corrected Visual Predictive Check Stratified by *CYP2C9* Genotype

Prediction-corrected visual predictive check for the final model; the red lines at the center represent median observed concentrations and the dotted red lines represent 5th and 95th percentiles of observations. Red areas represent 95% confidence intervals for 50th percentiles of prediction intervals and blue areas represent those for 5th and 95th percentiles of prediction intervals.
